Diam 60) - Référence : JLBM53PRES10C

PUNCH HOLDER FOR D10 COMPACT PRESS (DIAM 2 TO DIAM 60)

36,75 € excl. tax
44,10 € incl. tax

Made in France

SKU: JLBM53PRES10C | **Categories:** [Press adaptors](#), [Striking tools and accessories for hollow punches](#) |

DESCRIPTION DU PRODUIT

This system makes it possible to attach BOEHM punches to a press while retaining the pairing system. This part has an M20x1 threaded end to accommodate JLBM50PA (Diam 2 to 50 mm) and JLBM60PA (Diam 2 to 60 mm) chucks. A stud with a flattened surface enables the part to be immobilized by an M6 set screw in a Diam10 bore.

This part is a compact version of part JLBM53PRESSE, when you have limited space under the press(See part drawing).

Press compatibility

This part is compatible with EMG 2HR rack-and-pinion manual presses as well as 5HR toggle presses, or any other press with a 10 mm diameter bore.

Diam 60) - Référence : JLBM53PRES10C

Other informations

Hollow punches cutting with a press requires certain precautions. It's important to ensure that the press used provides the necessary power with a slow movement, and that the cutting support is suitable.

We also offer a fully equipped manual press ready for use with our tools. You can find it [here](#)
